

Abstract for the Poster Session Immanuel Hospital Berlin

We illustrate the Overall project “MFH” in three examples / posters.

First poster shows the integration of the cross cultural competence to the business philosophy of our hospital:

Concept for a hospital with cross cultural competence

- Making possible equality
- Respecting diversity
- Improving health gain
- Secure economy

Second poster visualizes the intercultural training for staff in our hospital and gives an overview of facts and experiences.

Third poster shows a practical help for everyday life in the clinic. It is an example for a communication instrument named KOM-MA which gives us translations in 13 languages for daily life activities.
